

DOC-021 - Decision Register

Solution: ERIS Distributor Cider Order-to-Payment Solution

Version: 0.1

Status: Draft

Dependency order: Continuous

Owner: To be assigned

Last updated: July 25, 2026 - 7:35 AM CT

1. Purpose

Maintain the controlled record of deferred decisions, ambiguities, dependencies, resolutions, rationale, owners, dates, and affected documents.

2. Scope

This document is limited to the subject identified by its title. It does not replace the Business Requirements Specification or any dependent technical specification.

3. Dependencies

Requires: DOC-002

Provides input to: All documents

4. Current Status

Draft

Status is assigned under STATUS_DEFINITIONS.md. No percentage-complete estimate is used.

5. Revision History

Version	Date	Status	Description
0.1	July 25, 2026	Draft	Initial controlled repository document created from verified project sources.

6. Known Completed Sections

- Deferred items are listed in Section 38 of the Version 0.1 blueprint.
- Known open decisions include approval reminders, Close Approval authority, role matrix, pickup-time approval reset, edit-lock timeout, copy-order initial state, suggested-PO approval/send behavior, revised-email statuses, attachment-category rules, invoice date display, Internal Order ID footer, post-approval edits, invoice send failure,

duplicate-send controls, error messages, holiday calendar, and visual refinements.

7. Needs Refinement

- Decision IDs must be reconciled with the project's existing open-decisions file.
- Owners, target dates, options, rationale, resolution, and affected artifacts are not complete.

8. Tasks to Complete

- Import the existing open-decisions register from the repository.
- Assign stable IDs and affected-document links.
- Add decision owner, required-by milestone, options, outcome, rationale, and approval evidence.
- Update dependent document statuses whenever a decision is resolved.

9. Deferred Decisions

See `D0C-021-decision-register.md`. Only decision entries supported by the controlling specification or repository records may be added.
