

DOC-004 - Operating Workflow Manual

Solution: ERIS Distributor Cider Order-to-Payment Solution

Version: 0.1

Status: Draft

Dependency order: 4

Owner: To be assigned

Last updated: July 25, 2026 - 7:35 AM CT

1. Purpose

Document the current manual process, target automated process, human responsibilities, exceptions, restart points, and operational controls.

2. Scope

This document is limited to the subject identified by its title. It does not replace the Business Requirements Specification or any dependent technical specification.

3. Dependencies

Requires: DOC-002, DOC-003

Provides input to: DOC-017, DOC-018, DOC-019

4. Current Status

Draft

Status is assigned under STATUS_DEFINITIONS.md. No percentage-complete estimate is used.

5. Revision History

Version	Date	Status	Description
0.1	July 25, 2026	Draft	Initial controlled repository document created from verified project sources.

6. Known Completed Sections

- The business process is defined from order intake through final packet and closeout.
- Four approved entry points are defined.
- Human approval, confirmation review, BOL print confirmation, payment confirmation, and order closeout remain explicit human actions.

- No-response and payment-discrepancy escalation paths are defined at a business-rule level.

7. Needs Refinement

- The current manual process has not been fully documented step by step.
- The target operating table with step, actor/system, input, output, and failure handling has not been completed.
- Restart and recovery procedures are not yet defined for each failure stage.
- Role names remain dependent on DOC-013.

8. Tasks to Complete

- Interview process owners and document the current manual process.
- Build the target step-by-step operating table.
- Add exception, restart, recovery, and escalation procedures.
- Add screen references after DOC-009 exists.

9. Deferred Decisions

See `DOC-021-decision-register.md`. Only decision entries supported by the controlling specification or repository records may be added.
